

Facts & Stats

More people are riding bicycles

In Australia there are over 5 million bicycles being used by a growing cross-section of people either as a means of transportation or for recreation.

It is estimated that 5% of all trips are made by bicycles and 20% of Australians regularly use a bicycle – at least once a fortnight.

In 2014 over 1.3 million new bicycles were sold – once again eclipsing the number of motor vehicles sold.

Cycling for transport and recreation

Cycling is a clean and efficient mode of transport which is well suited for trips less than 5 kilometres, particularly in inner urban areas where roads are congested and parking spaces are at a premium.

Cycling also plays an important part in recreation within the community and is an excellent family activity for people of all ages. Estimates show that bicycle use in some cities is growing by more than 10% per annum, resulting in both state and local governments funding construction of thousands of kilometres of dedicated cycleways and shared paths.

Secure parking facilities essential

Unfortunately with this upsurge of bicycle use there is an increase in bicycle theft and therefore a need for professionally designed, secure parking facilities.

Leda, with its proven background in mechanical and physical security products, has developed the Securabike range of rails and racks, lockers, cages and shelters that not only carry the Securabike style and appeal but are designed with security in mind.
