

Securabike’s experienced sales staff are available to provide assistance in selecting the appropriate product, organising and arranging installation or simply assisting with pricing.

Installation

Installation of all Securabike’s bicycle security products is relatively simple. They can be cast-in on fixed insitu models, or bolted to the pavement (with masonry anchors) on all base plate models.

One of the easiest ways of providing additional bicycle parking is converting existing car parking spaces.

> Refer p10-11 for general arrangements.

An installation service is available by Securabike’s trained and experienced installers. As site conditions vary, it may be necessary to inspect the site and provide a quotation for each project. To ensure correct installation, masonry anchors can be provided with all Securabike bicycle parking products.

Service and Maintenance

Securabike’s technicians help repair and maintain lockers with preventative maintenance programs to ensure the continued operation for the convenience of cyclists. The removal of graffiti, rubbish and wildlife is common.
