

Fully enclosed galvanised steel lockers provide the highest level of security (Class I) to AS2890.3. While they are the most popular secure parking for cyclists, they are the most expensive bike parking option.

Securabike's BSL and BVLH lockers are in wide use in various state and metropolitan rail networks, making them a widely-specified and used locker.

Securabike bicycle lockers are available in both horizontal and vertical models and are manufactured from 1.6mm galvanised sheeting for maximum durability and corrosive resistance (BSL18S and BSL18D). They can also be powder coated in a range of colours at an extra cost. Some models are now available in stainless steel (grade 316) to cater for locations near the seafront where corrosion is a concern.

Horizontal lockers have been designed as a demountable unit and are supplied either as a flat pack or pre-assembled. Flat packs offer substantial freight savings, particularly if being transported to regional or interstate locations. They are supplied in single or the more popular and cost-effective double locker.

Vertical lockers can be manufactured demountable or flatpack in 2, 3 or 4 locker modules which are constructed around a steel frame providing robust, high vandal-resistant security.

### **Advantages**

- Provide the highest level of security Class I
- Modular system tailored to suit application
- Single, double or vertical configuration
- Protects bicycle from weather
- Bicycle is hidden from view
- · Surveillance not normally required
- · Best suited for long term parking
- Individual locking with master keying system

#### **Applications**

- · Railway stations and bus interchanges
- Park and ride terminals
- Workplaces
- University and college campuses
- Apartments

68 Edition 9 - 2019

# Product Range

**②** 1300 780 450

Securabike Economy Range is supplied with standard hasp and staple that allows cyclists to use their own U lock or padlock. All other models comes with three point locking system with T handle as standard. Securabike lockers can be integrated with Electronic Locking System at an additional cost. Please contact sales for more information.

## **Recommended options**

#### **HSL**

Hasp and staple – allows the cyclist to use their own U locks or padlock

#### **VRTH**

Vandal-resistant T handle – springloaded handle locates flush when not being used, to minimise vandalism

#### MKL

Master keying – recommended for multiple locker installations to provide improved locker management and security

#### MHH

Metal hanging hooks – for helmets and apparel

## LVPI

Ventilation panels – provides air movement and also allows inspection to ensure lockers are in use, and being used correctly

## **Electronic Locking System**

Securabike has developed an electronic locking system for its range of lockers, cages and compounds. The system is designed to provide greater utilisation of the lockers while increasing security and minimising management costs.

## **Management Plan**

Securabike's many years' experience in supplying and maintaining bicycle lockers has highlighted the need to develop a management plan to ensure the best possible utilisation of the lockers, what security should be provided and what the cyclist needs to provide. Additionally, Securabike can advise on what service and maintenance needs are required to maximise the life expectancy of the lockers.

#### Finish

Lockers are supplied standard in a galvanised steel finish. Powder coating, in a range of colours, is available at extra cost.

## TBL18S

**Economy Range** 

Comes with hasp and staple as standard lock. Range of other locks available at an additional cost. Please contact sales.

Securabike's most cost effective bicycle locker. This design is supplied in knock down kit form. It uses a tubular steel frame that clips together. The door and cladding are then attached by pop rivets. Quick and easy to assemble and install.

#### Vertical Locker

This vertical bicycle locker features the smallest footprint of all bicycle lockers and is best suited for sites requiring the highest degree of storage density. The bicycle is suspended on an internal wheel hook with two additional hooks that can be used for helmets or clothing.

A sturdy internal frame with galvanised sheeting is further strengthened through the use of steel corner brackets.

Comes with three point locking system with T handle as standard. Range of other locks available at an additional cost upon request.

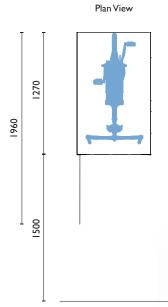

Creased roof panel to provide strength and fall for water run-off (stiffener channel under roof panel)

Optional stencil signage
